EDUCATION

Mar. 2019 ~ Present	Konkuk University Department of Computer Engineering <i>Bachelor Student</i> GPA: 3.7 / 4.5	Chungju, Korea
------------------------	---	-------------------

RESEARCH INTERESTS

-
- Convolutional neural network
 - Object Detection Algorithms
 - Facial Age Prediction

RESEARCH EXPERIENCES

-
- Research Student at Department of Computer Science and Engineering, Konkuk University, Intelligent Software Convergence Lab, Konkuk University Glocal Campus, Korea (Mar. 2024 ~ Present) / Development of scalable and efficient backend systems, focusing on server-side logic, database manag
 - Research Student at Department of Computer Science and Engineering, Konkuk University, AI Lab, Konkuk University Glocal Campus, Korea (May. 2024 ~ Present) / Development of facial age estimation models using deep learning under the guidance of a professor

AWARDS AND HONORS

-
- K-Digital Training 과정최종프로젝트, Multi Campus, Korea (May. 2023)

PROJECTS

-
- Study hub, 5vengers, Korea / Developed and optimized databases for efficient data storage and retrieval, ensuring seamless API in (Feb. 2023 ~ May. 2023)
 - Research on Wildlife Behavior and Ecology Control Technology by Applying Reinforcement Learning Based on Generative AI Integrated Model, Intelligent Software Convergence Lab, Konkuk University Glocal Campus, Korea / Developed a server for app communication,

including extensive API development and database configura (Mar. 2024 ~ Present)

- Face Age Estimation Using Deep Learning, AI Lab, Konkuk University Glocal Campus, Korea / Developed a deep learning model for facial age estimation, focusing on data preprocessing and model (Oct. 2024 ~ Present)

SKILLS AND TECHNIQUES

- Languages: Python, Java
- Frameworks: Fast API, Spring, PyTorch
- Databases: MySQL, H2
